

ELECTRIC POWER  
FOR ELECTRIC APUS

## RelGen™

Electrifying Heavy Trucks  
Battery Charging System  
Charge as You Drive

### Fast & Dedicated Charge

2 Times Faster  
200 Amps of Dependable Charge  
Maintains Higher Voltage Starter Batteries

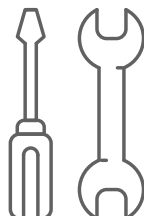

### Saves Money

Reduces Idling  
Prevents Idling fines  
Extends Battery & DPF Life  
Eliminates Dead Batteries

### Sustainable\*

Low To No Emissions  
Electronic Monitoring  
Carbon Credit Reports  
(\*Applies to RelGen™ Eco-Mode)

### Easy to Install

Install on your own, or at your  
Mod Center or Up Fitter  
No Special Tools or Training  
No Change to Factory Equipment

# THE RELGEN IS PATENTED

### PROPRIETARY HARDWARE & SOFTWARE

- ▶ Driveshaft Powered Electric Generation
- ▶ Patented
- ▶ Durable Auto Grade Hardware, Telematic and Proprietary Software

## RENEWABLE ELECTRICITY GENERATION SYSTEM

### Power to Charge Your Batteries

### Power for Your Electric Components

- ▶ Pallet Jacks
- ▶ Moffett Forklift
- ▶ Cargo and Other Lights
- ▶ Cool Plates
- ▶ Day Cab Electric AC

Improve Battery Health & Life	✓	✓
Lower Maintenance Costs	✓	✓
Data for Troubleshooting and Preventative Maintenance	✓	
Emissions-Free Charging & Carbon Credit Reporting	✓	

\* Does not include installation. Volume discounts may apply. Until June 1, 2020.

## HOW IT WORKS

### HOW RELGEN WORKS

The RelGen captures the kinetic energy of the moving truck during coasting and braking. RelGen efficiently creates, delivers, and monitors power while the truck is in motion. By connecting to the drive shaft instead of the engine, RelGen charges up to 2x faster than a standard engine alternator.
